### REASONS FOR ALLOWANCE

1. Applicant is noted that "the abstract which appears on the page of the PCT Gazette of published international application number WO 99/14575 will be used as the abstract for this application".

2. The following is an examiner's statement of reasons for allowance:

There was no prior art found by the examiner that suggested modification or combination with the cited art so as to satisfy the combination of all the limitations in claims 85 and 88.

As to claims 85 and 88, the prior art of record, taken alone or in combination, fails to disclose or render limitations "directing a beam of radiation along a first path at an **oblique angle of incidence** onto a surface of the sample", "a first detector located to detect light scattered by the surface within a **first range of collection angles** from a normal direction to the surface", "a second detector comprising a curved mirrored surface and located to detect light scattered by the surface **within a second range of collection angles** from the normal direction, **the second range being different from the first range**", and "comparing between the outputs of the two detectors to **distinguish between the particle and a COP on the surface**", in combination with the rest of the limitations of claims 85 and 88.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
